# CUNY SCHOOL OF PUBLIC HEALTH at HUNTER COLLEGE *Community Health Undergraduate Program*

# COMMUNITY HEALTH - B.S.

Community Health students utilize their educational skills and knowledge of public health issues to encourage and improve the health of communities. They develop, implement, and coordinate health interventions and programs to effectively communicate what is good health, how to prevent disease and illness and how to secure treatment.

Through a variety of coursework, students are provided with the tools essential for employment and pursuit of graduate education in public health, social work and related fields. As an emerging field, Community Health majors are employed in community – based and human rights organizations, family planning clinics, mental health centers, homeless shelters, research centers, media organization as well as in city and state health departments.

*"The good we secure for ourselves is precarious and uncertain until it is secured for all of us and incorporated into our common life"*

*-Jane Addams*
