## About QuBi

**Background.** In 2003 the National Research Council published *BIO2010*, a report that recommends replacing the traditional model of undergraduate biology curricula with a “strong interdisciplinary curriculum that includes physical science, information technology, and mathematics.” Hunter College was one of the nine awardees of a NIH/NIGMS/MARC program during 2008-2013 to transform undergraduate biology curricula. Today, QuBi mission continues with support from Hunter Administration and the four participating Departments.

### Program Highlights

- **Five Bioinformatics Concentrations.** We have designed and implemented five new bioinformatics concentrations in Biology, Computer Science, Chemistry, Mathematics, and Statistics. Course requirements for the five concentrations are available at [QuBi website](#). Watch [what students and faculty say about QuBi](#).
- **Over Twenty New & Revised Courses and Lab Modules.** We have designed and implemented six new quantitative biology courses and revised over twenty existing courses. Each year, over two thousand Hunter students are exposed to quantitative biology & bioinformatics through these revised courses.
- **Wiki Syllabi** of new and revised courses and modules: ♦**BIOL 425** Computational Molecular Biology (QuBi capstone course; [course wiki](#)) ♦**BIOL 470.83** Summer Bioinformatics Workshop ([course wiki](#)) ♦**BIOL 203** Molecular Genetics; Lab 4 ([module wiki](#)). ♦**BIOL 203** Lab 7 ([module wiki](#)) ♦**BIOL 303** Cell Biology ([module wiki](#))
